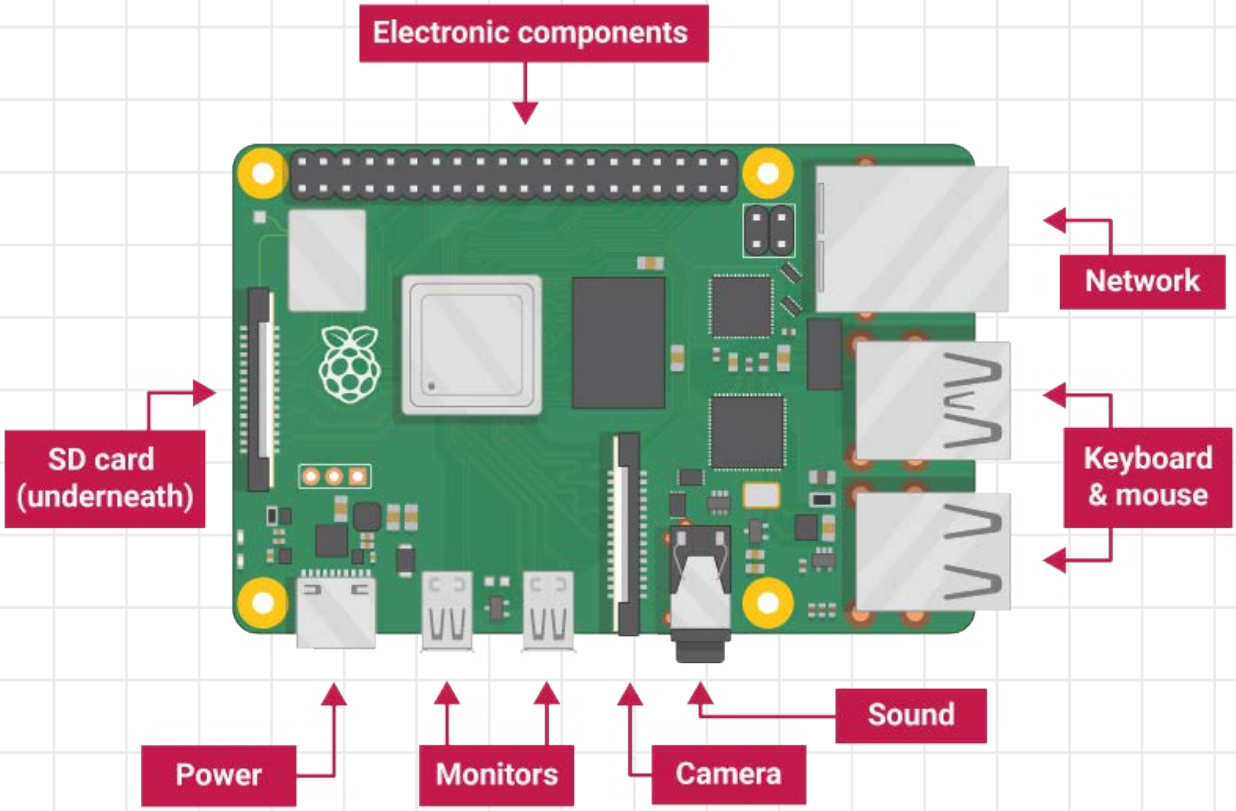
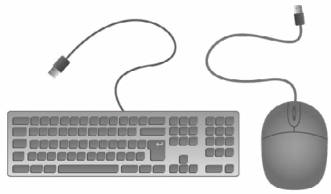
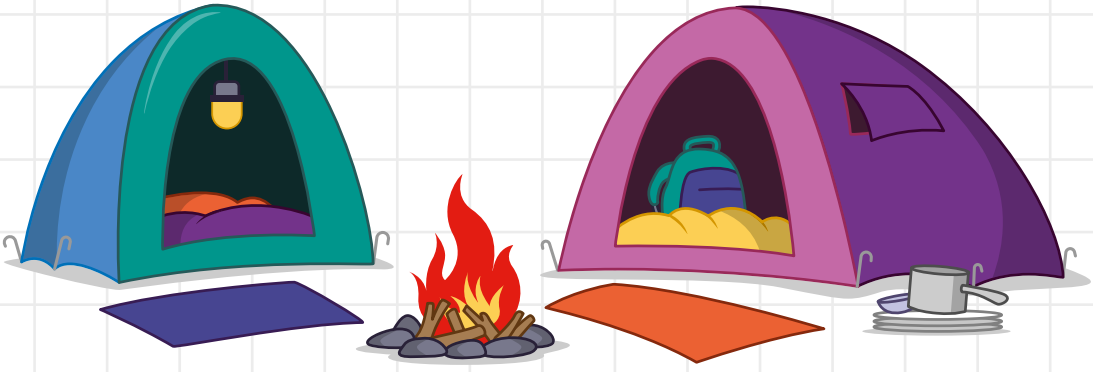
Setting up a Raspberry Pi

What you will need:



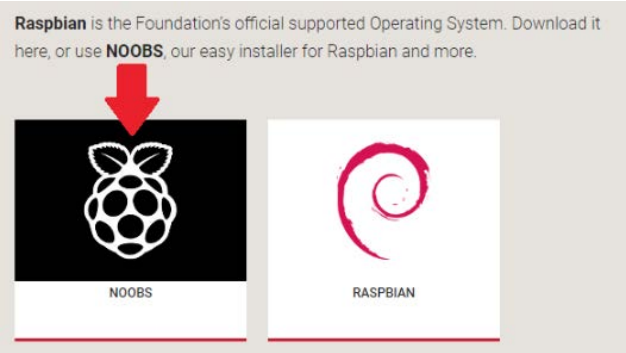




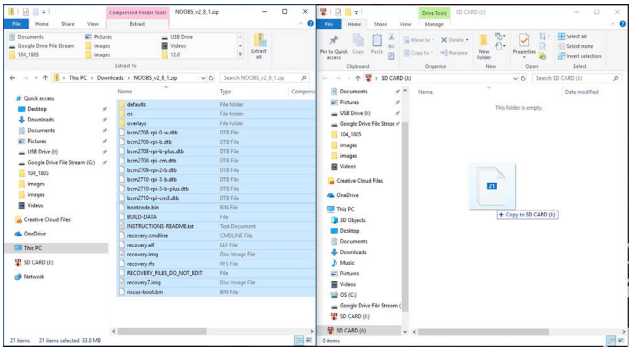
Scouts Raspberry Pi

Setting up a Raspberry Pi

- Visit **rpf.io/downloads**
- You should see a box linking to the NOOBS files. Click on the box and download the zip file.
- Find the zip file that you have downloaded — by default, it should be in your 'Downloads' folder.
- Double-click on the zip file to extract the files. This will open an Explorer/Finder window, which you should keep open.



- Visit **rpf.io/sdcard** and download and install the SD Memory Card Formatter.
- Insert your microSD card into the adapter, then insert the adapter into the computer's SD card slot.
- In SD Memory Card Formatter, select your SD card and then format the card.
- Copy the files that you extracted from the zip file onto the microSD card.



- Once the files have all been copied over, eject the microSD card.
- Remove the microSD card from its adapter.

- Insert the microSD card into the Raspberry Pi.

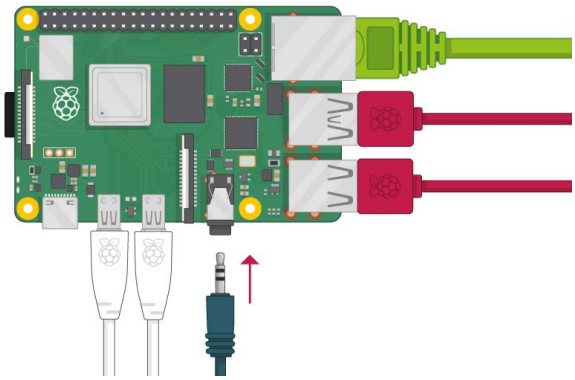
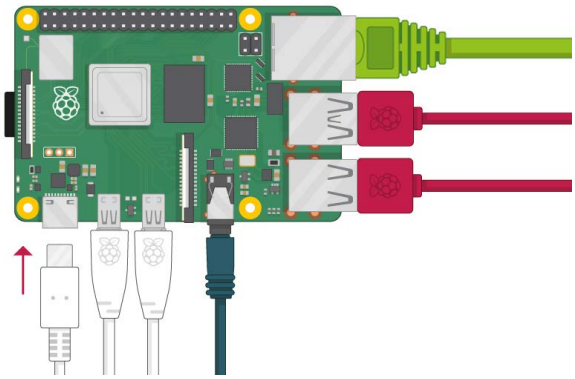
Setting up a Raspberry Pi

- Connect your keyboard, mouse and one or two monitors.
- If you're connected to the internet by Ethernet, you can connect the Ethernet cable.
- If you have speakers or headphones, you can connect those as well.



- When you are ready to start your Raspberry Pi, connect the power supply.



- The screen should show four raspberries as Raspbian boots up.
