

Carbon Monoxide (CO)

Carbon Monoxide (CO) is a highly poisonous gas which can be produced by your cooking equipment or lamp..

You can't see it, taste it or smell it and without adequate ventilation it can kill quickly with no warning.

DON'T cook in small, poorly ventilated spaces or in areas where people sleep.

DO consider the use of a CO Alarm as an added precaution.

Go to scouts.org.uk/safety for more detailed information about the safe use of equipment
